Tenant & Landlord Authorization

McMinnville Access Company, dba OnlineNW, a provider of high speed internet service has been contracted by _____ (the "Tenant") to install and provide high speed Internet service.

The Tenant has requested service installed at the property located at:

This property is owned/operated by _____ (the Landlord").

McMinnville Access Company, dba OnlineNW is a licensed, insured, and bonded contractor.

In order to complete installation of this service, McMinnville Access Company, dba OnlineNW requires approval from both the Tenant and the Landlord (or its representative) in order to proceed.

Typical Installation:

Installer mounts radio module (internal antenna and modem) and wall mounts to face board of eaves or to side of structure. Installer may also utilize existing TV antenna mast to attach antenna to. Installer will then run cable to decided location to bring cable into the structure. Installer will drill one 1/2" hole in structure wall to bring cable from exterior to interior of structure. Installer applies silicone to the exterior side of this hole for weatherproofing purposes. In some cases an indoor antenna may be able to be used.

Please execute this document providing McMinnville Access Company, dba OnlineNW, with your authorization to installation high speed Internet at the location specified above. Please contact our offices directly if you have any further questions.
